*Olympia
LePoint*

What did U.S. rocket scientists and U.S. Senators both need? The answer: Olympia LePoint -- a creative problem-solver whose life-story exemplifies “beating all the odds.” Former rocket scientist, Olympia LePoint is a creative problem-solver and mathematician, whose specialty is *“Making Sure Things Add Up.”* However, this mathematician had to find ways for her own life experiences to add together.

Owner of **OL CONSULTING**, Olympia has gained years of leadership experience in a major fortune-500 aerospace company, a federal banking institution, within a U.S. Senator’s Office, and as a Math Professor. She has acquired national awards for her problem-solving abilities.

Through triumph over adversity and rigorous scientific training, Olympia communicates a system that can “beats all odds.”
